

MEMORANDUM

AGENDA ITEM #V.E

DATE: MARCH 5, 2012
TO: COUNCIL MEMBERS
FROM: STAFF
SUBJECT: BUDGET PERFORMANCE REPORT

Since the Council's Fiscal Year 2011-12 budget was approved in September, Council staff increased projected funding for the year by \$292,664, eliminating the funding gap as of November 2011.

At the Council's request, staff has prepared the attached Budget Performance Report, which presents projected funding streams for the Fiscal Year 2011-12 operating budget and work program approved at the September 2011 Council meeting. The revenues are listed in accordance with the "funds" format, consistent with the Council's accounting software - the General Fund Revenues are listed first, followed by the Special Revenue Funds, which have been subdivided into Federal, State and Local categories. The last entry is New Program Development, which represents the as yet unfunded needs for the Fiscal Year.

Revenues listed in the column Approved Budget (along with any interim adjustments that have not yet been presented in the form of a budget amendment) are distributed across four categories that reflect the current status of the projected funding:

- Contract Signed - funding in this category is ensured by a contract that has either been signed or formally authorized, and includes multi-year funding streams that have been carried forward from the previous Fiscal Year.
- Contract Not Yet Signed
 - Firm - staff has a high level of confidence that this funding will be secured based on past funding practices and/or written and verbal commitments
 - Expected - staff has a moderate level of confidence that this funding will be secured based on past funding practices and/or written and verbal commitments
 - Applied - funding is possible, based on grant applications already submitted or other specific expectations

All funding amounts in the column "Approved Budget" are from the most recent budget approved by the Council (in this case, September 2011). This column will be updated each time an amended budget is approved by the Council. The remaining four columns reflect the level of confidence in current projected revenues as of the date on the table, and will not necessarily add up to the total approved budget. The total values of individual projects may change as funding streams are adjusted by the funder, which could impact even those projects for which a contract is already signed. Also, as the level of confidence in each funding stream changes, the values will be moved from one column to another.

As the Fiscal Year proceeds, updates to this report reflect changes in the needs for New Program Development even before a budget amendment is prepared for the Council's review. So far in the current fiscal year, the following significant changes are reflected in the report:

- a US Department of Energy Electric Vehicle Planning Grant, which added \$500,000 to the overall revenues and \$210,000 in net funding for the Council; current estimates indicate that approximately \$396,328 of the total will be earned during the current fiscal year, of which \$166,328 in net funding for the Council
- a new grant of \$90,611 from the Centers for Disease Control and Prevention, through the Broward Regional Health Planning Council, for work related to the Transforming Our Community's Health (TOUCH) project
- an increase of \$321,364 in funding from the Centers for Disease Control and Prevention, through the Miami-Dade County Health Department, for activities related to healthy foods, farmers markets and community gardens, of which \$254,742 will be passed through to other contractors, leaving a net increase of \$66,622 for the Council
- a \$25,000 mini-grant from the US Environmental Protection Agency to serve as the fiscal agent for a local community organization, of which all but a small amount will be passed through
- a new grant of \$100,000 from CitiBank to the Institute for Community Collaboration, of which \$75,000 is being used to support Council membership in the Open Indicators Consortium, for development of an indicators project that will tie into the Sustainable Communities Initiative, resulting in net funding of \$25,000
- three new training contracts through the Florida Division of Emergency Management's Interoperable Emergency Communications Grant Program for a total of \$19,000
- funding of \$39,000 from the Florida Division of Emergency Management, through the Northeast Florida Regional Council, to complete a surge depth analysis for South Florida and to support the analysis for Treasure Coast, as part of the Statewide Regional Evacuation Study Program
- an expected reduction of \$25,000 in the annual Department of Energy funding for the Gold Coast Clean Cities Coalition
- elimination of the anticipated revenues of \$12,000 for projected cost reimbursements for the Site Certification review of the proposed expansion of the Turkey Point nuclear facility, under coordination of the Florida Department of Environmental Protection, since the current calendar suggests that these funds will only be received in our next fiscal year
- cancellation of an expected contract through the Florida Division of Emergency Management to complete an update to the Tactical Interoperable Communications Plan, for \$50,000, of which half was reserved for external contract work

In addition, staff incorporated small adjustments to the projected funding amounts for several projects to reflect funds carried over from the previous fiscal year, which became known with the closing of the books on Fiscal Year 2010-11.

The net difference of all of the changes described above made it possible to eliminate the New Program Development line of \$292,664 at the time the budget was adopted in September.

Recommendation
