

The CCB: Working Together

# *Our Safety*

*Florida has the highest crime rate in the nation, coupled with an alarming increase in the number of youths committing violent crimes. Reducing crime in our communities while improving the criminal justice system can accomplish two major goals: people feel safer and offenders learn to contribute to society.*

*Personal safety is threatened at home, in the community and in the workplace. Our lives are touched by domestic violence, drug and alcohol addiction, as well as accidents on our highways, bikeways, and waterways. Workplace safety has become an increasing concern for employees and employers. Our experience with hurricanes has made us particularly sensitive to the need for emergency assistance, protection from and response to natural disasters.*
