

CHAMBER *South*

WHEREAS, the South Miami-Dade Watershed Study area encompasses Chamber South's entire service area; and

WHEREAS, the Study has been on-going for several years and is coming to completion; and

WHEREAS, as the study nears completion, it becomes imperative that data and work product be distributed to Chamber South constituent members with sufficient lead-time to receive feedback; and

WHEREAS, lead-time of several days is insufficient especially in view of the complexity, volume and changing nature of the data.

FURTHERMORE, The "Preferred Scenario" map, which is to be voted upon on February 23, 2006 is based on a report that is not being voted on until March 2006 and logic dictates that the report be reviewed and voted upon prior to voting on the map; which is the result of the report.

NOW, THEREFORE, be it resolved that Chamber South suggests that work product, data and reports be reviewed prior to voting on any documents such as a "Preferred Scenario"-map, which are based on the not yet reviewed reports; and

RESOLVED, FURTHER, that while Chamber South acknowledges the importance and timing of the study, Chamber South believes it is of utmost importance that sufficient time is given to our constituents to review and comment on the reports and work product.
