

SOUTH MIAMI-DADE WATERSHED STUDY
PROJECT MANAGER'S REPORT
To the South Miami-Dade Watershed Advisory Committee
March 23, 2006

This report covers the month of February and a portion of March 2006. SFRPC activities have included:

- Attendance at scheduled meetings with the Project Management Team to discuss project planning for future tasks, and review of progress related to the impact assessments and preferred alternative
- Meeting with the Organization Committee
- Meetings with County Staff
- Meeting with the City of Florida City to address specific concerns

Project Status: The February 23, 2006 meeting was meeting number 42. At that meeting Committee members continued their work on the assessment map (Sub-task 4.2), but due to the large number of member comments it was decided not to ask for consensus on the map. Rather, the chair requested that members submit their comments in writing so that the Project Management Team (PMT) and Organizational (ORG) Committees could prepare responses. A large number of comments were received and the PMT and ORG Committees decided to cancel the previously scheduled March 9, 2006 meeting and use the time to analyze the comments and prepare responses.
