The Florida Planning Toolbox

Made possible by a grant from the Florida Department of Community Affairs, *The Florida Planning Toolbox* provides descriptions of planning tools designed to help Florida Communities and their regions achieve their goals to establish quality communities with a sense of place; create a diverse, sustainable economy; establish an integrated and enduring process to protect and improve the environment; and provide access to the highest quality education and health care and a rich cultural heritage. In addition to a description of each tool, the toolbox includes illustrative examples of Florida communities that have put many of the tools into practice. The examples highlight the broad range of tools being used in our state to preserve natural resources, promote a strong, resilient economy, and plan for the future livability of Florida's communities. CUES prepared the toolbox as part of its mission to work with policy makers and the public in their pursuit of options for managing growth while preserving natural systems, promoting a strong economy, and planning livable communities.

To download your free copy of the toolbox or to use the

Searchable on-line version, go to:
